Overview

Polar fleece jackets are cozy and durable outerwear garments made from synthetic materials. These jackets are designed to provide warmth and insulation during cold weather, making them ideal for outdoor activities in the winter months. With or without a hood or a choice of zip off sleeves transforming it into a body warmer.

Material and Design

Crafted from premium microfibre polar fleece, this jacket traps body heat and provides exceptional insulation, keeping you warm and comfortable even in chilly conditions. The removable sleeves allow you to customize the jacket to suit your needs, whether you want a full-fledged jacket or a lightweight body warmer. Sizes available: S - XXXL.

Functional Elements

1

Jackets with convenient zip-off sleeves forming a lightweight insulating body warmer.

2

Jackets and body warmers made with full-length zip or 1/4 zip with 2 or 3 pockets.

3

Hood can be added and can be made with inserts in contrast colors.

The background features a series of elegant, flowing, and overlapping lines in white and gold, creating a sense of movement and depth. The lines are smooth and curved, with some appearing as thin, delicate strokes and others as more substantial, layered bands. The overall effect is one of sophisticated and modern design.

Thank you
